

Hi.

My name's Webster and I'm studying humans at my school. I guess I should tell you I'm a tarantula. But don't be scared! I just have questions. I've heard some pretty weird things... Like, what are arms? Why don't you walk on them!? And what are 'hands'?!? (They seem kinda gross. Sorry!)

I can answer any questions you have about spiders. Even spinning webs. Tarantulas do that, too.

Thanks!

Hi again,

That's so crazy!!! I thought tarantulas were weird, but humans are the weirdest. Something you might find weird about me is I'm kind of hairy. And I'm totally not old! My little brother is the size of one of your finger ends? Finger nails!? While my dad is probably as big as your hand.

What do you like best about yourself? I like my 7th leg. It's super duper strong.

Hiya,

It's almost test time! I think I know everything I need to know. I still mix up fingers and toes. Is there an easy way to remember??? I don't know how you walk on only two legs. Creeeeepy.

Well, I'd better keep studying. Take care!
